ORGANISM: Unknown
PETATURE:
NAME/KEY: gene
LOCATION: nt40; nt60
OTHER INFORMATION: Entire Rb 165 rRNA gene sequence of a new human
OTHER INFORMATION: blood bacterium (HBB). The identification of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 1, Application US/09894467
Patent No. US20020155519A1
GENERAL INFORMATION:
APPLICANT: Lindner, Luther E.
APPLICANT: MacPhee, Rathleen
TITLE OF INVENTION: Human Blood Bacterium
FILE REFERENCE: D6026D
CURRENT APPLICATION NUMBER: US/09/894,467
CURRENT PILING DATE: 2001-06-28
PRIOR FILING DATE: 1998-11-02
NUMBER OF SEQ ID NOS: 20
SENGTH: 1208
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           US-09-894-467-1

                                                                             as
                  Sequence 1, Application US/09791592
Patent No. US20010021223A1
GENERAL INFORMATION:
APPLICANT: Canon Inc.
TITLE OF INVENTION: Polyhydroxyalkanoate containing 3-hydroxybenzoylalkanoic acid
TITLE OF INVENTION: monomer unit, and method for producing the same.
FILLE REFERENCE: 4396021
CURRENT APPLICATION NUMBER: US/09/791,592
CURRENT FILING DATE: 2001-02-26
NUMBER OF SEQ ID NOS: 1
                                                                                                                                                                                                                                                         ĝ
                                                                                                                                                                                                                                                                                                                                                                                     175
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 361
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                570
